

NEWS RELEASE

4/14/08

The US EPA CLU-IN Technology Innovations News Survey website (under the category Demonstrations/Feasibility Studies) published the abstract and link to the paper titled "Innovative Coupled Chem-Bio Treatability Study Leading to Large Scale Pilot Test at a Wood Treating Facility" authored by Jim Studer of ChemRem, Dr. Mike Lee of Terra Systems, Jack Sheldon of AMEC (now with ERM), and Norm Kennel of Premier Environmental Services. This paper was presented at RemTech 2007, a leading Canadian conference held annually in Banff, Alberta. A PDF version may be downloaded from this site.
