

## **PRESS RELEASE for 1/20/07**

ChemRem and FMC Corporation have recently collaborated on development of laboratory analytical protocols for the bench scale testing of OBC for soils, groundwater, and fractured bedrock applications. Several commercial laboratories across the United States and Canada are currently utilizing the new protocols as well as FMC protocols for bench testing using PermeOX® Plus in support of pilot and full-scale design applications involving a variety of contaminants. These protocols as well as product samples are available upon request. ChemRem represents the FMC products OBC, PermeOX® Plus, and calcium peroxide throughout the U.S. and Canada.

ChemRem™ International LLC (ChemRem) is an Arizona Corporation founded in 2006 to provide manufacturer representation service to the environmental remediation and restoration marketplace. ChemRem's focus is on products for chemical oxidation and bioremediation of organic contaminants present in soil, rock, groundwater, surface water, and wastewaters. ChemRem represents industry leading products manufactured by FMC Corporation of Philadelphia, PA, the world leader in peroxygen chemistry and products. PermeOX® Plus, hydrogen peroxide, Klozur® brand of persulfate, and the new product Klozur® CR are some of the products that can be obtained from FMC with ChemRem assistance. As the Authorized Representative for North America, ChemRem provides technical assistance in product selection and application and facilitates the ordering process. Operational headquarters are located in Albuquerque, New Mexico, USA. A technical sales representative may be reached at 877-ChemRem or at [sales@chemrem.com](mailto:sales@chemrem.com).
