

PRESS RELEASE for 7/1/06

ChemRem and FMC reached agreement for ChemRem to carry the FMC product OBC. OBC is a specialty chemical oxidation product based on FMC activation chemistry-Sodium Persulfate activated by hydrogen peroxide and high pH. This product can easily be mixed into soil or injected as aqueous slurry into the subsurface to destroy a wide range of organic contaminants. ChemRem will represent OBC throughout the United States and Canada.

ChemRem™ International LLC (ChemRem) is an Arizona Corporation founded in 2006 to provide manufacturer representation service to the environmental remediation and restoration marketplace. ChemRem's focus is on products for chemical oxidation and bioremediation of organic contaminants present in soil, rock, groundwater, surface water, and wastewaters. ChemRem represents industry leading products manufactured by FMC Corporation of Philadelphia, PA, the world leader in peroxygen chemistry and products. PermeOx® Plus, hydrogen peroxide, Klozur® brand of persulfate, and the new product Klozur® CR are some of the products that can be obtained from FMC with ChemRem assistance. As the Authorized Representative for North America, ChemRem provides technical assistance in product selection and application and facilitates the ordering process. Operational headquarters are located in Albuquerque, New Mexico, USA. A technical sales representative may be reached at 877-ChemRem or at sales@chemrem.com.
